

Linux System Engineer / System Administrator

Context

InnoXess is a technology company with headquarters in Murcia, Spain. With our Project Management Office setup our clients can be sure that our projects follow the highest standards and will be delivered on time, within budget and they will get the best possible product/service.

InnoXess specializes in providing skills, resources and complete solutions for Internet, High-Tech, and Media projects. InnoXess basis and aims are to support companies, start-ups and ventures from the technical point of view and to help business growth with our high quality services.

Overall Profile

In the course of our further development products we want to expand our core development team.

We look for ambitious, dedicated and talented men and women.

We look for professionals with very high programming and network knowledge, who have the ability to work together with other colleagues to reach goals efficiently with regards to integrate technologies into the product neatly.

In terms of technical communication we use and focus on English. Thus we expect fluently spoken and written English skills and the self-evident awareness of domain specific common IT and programming notions. However to ease our communication internally and externally Spanish and/or German would be an advantage.

Specific profile

- Strong background in Unix and Linux system engineering
- Ideally proven experience with the operation and administration of Linux based network systems in complex environments
- Indepth knowledge and experience with one more more related scripting and/or programming languages (eg. sh, Perl, Python; C, C++)
- Active and proven knowledge of configuring and maintaining PKI based security contexts
- Experience with actual security concepts, eg. SSH, VPN, etc.
- Linux certification is of advantage
- Nagios resp. knowledge of another monitoring solution is of advantage
- Ability to think conceptually and to reflect open issues questions with techies and with regard to business related features as well

C/C++ Programmer in the Unix/Linux context

Context

InnoXess is a technology company with headquarters in Murcia, Spain. With our Project Management Office setup our clients can be sure that our projects follow the highest standards and will be delivered on time, within budget and they will get the best possible product/service.

InnoXess specializes in providing skills, resources and complete solutions for Internet, High-Tech, and Media projects. InnoXess basis and aims are to support companies, start-ups and ventures from the technical point of view and to help business growth with our high quality services.
